DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Shirasawa et al.

The device as claimed is disclosed by Shirasawa et al with a tension roller 4, a tension applying part 13 which has a swing shaft supported by the frame at one end and the tension roller at the other end and a first elastic member 15 exerting a rotating force on the swing arm, a tension releasing part, and a tension actuating part.

3. Claims 1 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kohno et al.

Art Unit: 2859

The device as claimed is disclosed by Kohno et al with a tension roller 46, a tension applying part, a tension releasing part, and a tension actuating part to apply tension to a transfer belt.

4. Claims 1 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee.

The device as claimed is disclosed by Lee with a tension roller 40, a tension applying part, a tension releasing part, and a tension actuating part to apply tension to a photosensitive belt.

5. Claims 1 and 12 are rejected under 35 U.S.C. 102(e) as being e by Saito et al.

The device as claimed is disclosed by Lee with a tension roller 18, a tension applying part, a tension releasing part, and a tension actuating part to apply tension to an intermediate transfer belt.

Allowable Subject Matter

6. Claims 14-31 are allowed.

7. Claims 5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
